
About us

The Company

Lynxrail is a leading supplier of automated wayside inspection systems for high and low speed applications. Our systems use a range of technologies, including machine vision, thermal scanning, acoustic emission, and energy scanning.

The Company is also active in the design and support of railway vehicles and provides consulting services to a range of industries.

We have business locations in Australia, North America, and Europe.

Lynxrail is a business division of Lynx Engineering Consultants Pty Ltd.

Lynxrail Corporation is a related entity incorporated in the USA.
